

Google Ads Text Assets

Cloud Storage: Secure Vault | App campaign | United States | English

Version 2, revised 21 Sep 2026 | Package com.softwarealliance.cloudvault | Developer Cell Cave | Sources: the 15 Sep 2026 US keyword board (94 keywords, 522 apps, 11 competitors), 38 live US Google Play keyword searches and 10 live headline-title checks run on 21 Sep 2026.

1. What the analysis found

- **Generic keywords are shared by the whole category, so they are not brands.** "Cloud storage" sits in the titles of 45 third-party apps from 44 developers, including all 11 of your competitors. "Backup and restore" is in 42 titles, "cloud backup" in 12, "cloud drive" in 8 and "drive backup" in 5. These are free to use.
- **Titles built from those generic keywords rank.** "Cloud Storage: Drive Backup" (released Dec 2025) is #1 for "cloud storage drive backup". A 3.6K-install app is #1 for "cloud storage app drive backup". Fazcon is #1 for "cloud storage cloud drive".
- **Only an exact full title works as brand identity.** About 94% of titles are unique to one app. The headlines reuse the shared keywords and never repeat a full title.
- **Head terms are owned by big companies.** For "cloud storage", "cloud drive" and "cloud storage photos", 9 to 10 of the top 10 results come from big companies. Use these terms for relevance; the app will not outrank them soon.
- **The backup-and-restore keywords are the most winnable.** Those searches have 0 to 2 big companies in the top 10, and apps with 864 to 27.5K installs hold top-10 ranks.
- **"Secure vault" on its own is a different niche.** Searches for "secure vault", "private vault" and "file vault" return photo-hiding and app-lock apps, so "vault" is used only next to "cloud".
- **The app is live but not ranking yet.** It shows 500+ installs, was released 8 Sep 2026, and appears in none of the 38 result sets.

2. Ten headlines (limit 30 characters)

Each headline pairs a generic head term of the niche with a lower-competition keyword. The keywords come from the app's title, short description and the first paragraph of the full description, plus the keywords your competitors rank on. In the last column, "short" means the short description. Character counts include spaces and punctuation and were counted by script. No headline repeats an existing app title (see section 6).

#	Headline	Chars	Generic head term	Low-competition partner	From your metadata
1	Secure Cloud Storage Vault	26	cloud storage	secure cloud storage, cloud vault	Title
2	Backup & Restore Cloud Storage	30	cloud storage	backup and restore (every word of the board's top keyword)	Title + short
3	Cloud Backup & Easy Restore	27	cloud backup	cloud backup and restore (all words)	Title + short
4	Private Cloud Storage Drive	27	cloud storage	private cloud storage, cloud storage drive	Title + short + first paragraph
5	100 GB Free Cloud Storage	25	free cloud storage	100gb cloud storage	First paragraph
6	Cloud Photos & Video Backup	27	cloud photos	cloud photos backup, video backup	Short + first paragraph
7	Secure Cloud Drive Backup	25	cloud drive	drive backup, secure cloud	Title + first paragraph
8	Phone Backup & Quick Restore	28	phone backup	phone backup and restore (all words)	Short
9	Data Backup to Cloud Storage	28	cloud storage	data backup, cloud storage data backup	Title + short
10	Private Cloud Drive & Vault	27	cloud drive	private cloud, cloud vault	First paragraph + title

3. Ten descriptions (limit 90 characters)

Each description opens with an action verb, names a feature the app ships, and answers a user intent. None uses the full 90 characters.

#	Description	Chars
1	Back up photos, videos & data to secure cloud storage in one tap.	65
2	Restore your data to any phone in minutes from your secure cloud backup.	72
3	Get 100 GB of free cloud storage when you sign up. No card, no trial.	69
4	Move photos and videos to private cloud storage and free up space on your phone.	80
5	Keep sensitive files in a private cloud vault, locked with PIN or biometrics.	77
6	Switch phones easily: back up the old phone, then restore with no cables or PC.	79
7	Turn on automatic photo backup and save every picture in original quality.	74
8	Stream videos and open documents straight from your cloud drive.	64
9	Share files and albums with a link, and revoke access whenever you like.	72
10	Protect your memories with encrypted data backup you can restore anytime.	73

Every claim matches the live listing: 100 GB on sign-up, no card or trial, PIN and biometrics, original quality, encryption and link sharing. There is no "No ads" claim, no exclamation mark and no all-caps wording.

4. Ad group split

App campaigns are understood to accept 5 headlines and 5 descriptions per ad group, so the 10 + 10 are grouped by theme. Confirm the limit in the Google Ads account when creating the ad groups.

Ad group	Headlines	Descriptions
Storage, drive and security	1 Secure Cloud Storage Vault; 4 Private Cloud Storage Drive; 5 100 GB Free Cloud Storage; 7 Secure Cloud Drive Backup; 10 Private Cloud Drive & Vault	3, 4, 5, 8, 9
Backup and restore	2 Backup & Restore Cloud Storage; 3 Cloud Backup & Easy Restore; 6 Cloud Photos & Video Backup; 8 Phone Backup & Quick Restore; 9 Data Backup to Cloud Storage	1, 2, 6, 7, 10

5. Traffic, competition and competitor ranks

Google Ads Keyword Planner was not available, so **traffic** is the Google Play autocomplete demand score (0 to 100) from the 15 Sep board. **Competition** is taken from the live US top 10 on 21 Sep. "Big companies" are apps from large publishers such as Google, Microsoft and Dropbox, identified by developer, never by keyword. "Smallest app in top 10" excludes them and shows how small an app can be and still rank. Competitor ranks show 21 Sep first, with the 15 Sep rank in brackets.

Keyword	Demand	Big companies in top 10	Smallest app in top 10	Competitor ranks, 21 Sep (15 Sep)
cloud storage drive backup	55	6	27.5K	Cloud Storage: Drive Backup #1 (#1); Cloud Storage Drive Backup app #3 (#2); Fazcon out (#6)
cloud storage cloud drive	40	4	under 1K	Fazcon #1 (#1); Fuzon #6 (#7); CloudGate #10 (new)
cloud storage app drive backup	0	7	3.6K	Cloud Storage App Drive Backup #1 (#1); Cloud Storage Drive Backup app #4 (#3); Fazcon #7 (#8); Cloud Storage Backup & Drive out (#12)
cloud storage backup drive	27	6	74.6K	Cloud Storage Backup & Drive #2 (#2); Cloud Storage Drive Backup app #4 (new); Cloud Storage: Drive Backup #11 (#8)
cloud storage backup and restore	57	1	3.9K	Fazcon #8 (#10); Cloud Storage Backup & Drive #14 (#7); Cloud Storage: Drive Backup #21 (#17); Fuzon #28 (#26); CloudGate #29 (new); Cloud Backup : Cloud Storage out (#25)
100gb cloud storage	75	4	under 1K	Fuzon #6 (#11); Fazcon #7 (#5); CloudGate out (#13)
cloud backup cloud storage	0	4	27.5K	Cloud Backup : Cloud Storage #2 (#2); Fazcon #11 (#9); CloudGate out (#14); Cloud Storage: Drive Backup out (#11); Cloud Storage Backup & Drive out (#16)
backup and restore	88	0	864	none
cloud backup and restore	68	2	864	none
data backup and restore	68	1	759	none
phone backup and restore	55	0	27.5K	none
secure cloud storage	63	8	34.1K	none
private cloud storage	63	7	34.1K	none

Keyword	Demand	Big companies in top 10	Smallest app in top 10	Competitor ranks, 21 Sep (15 Sep)
cloud storage	60	10	none	none
cloud backup	60	7	27.5K	none
cloud drive app	59	9	522K	none
cloud drive	56	9	522K	none
secure cloud storage backup	56	8	34.1K	none
cloud vault	49	5	3.7K	none
cloud photos backup	47	7	3.9K	none
free cloud storage	44	9	34.1K	none
data backup	40	5	864	none
cloud photos	38	7	169.8K	none
secure cloud	35	2	694	none
cloud storage photos	35	10	none	Fazcon out (#6)
cloud storage drive	31	9	522K	Fuzon out (#14)

Play returned 9 to 30 results per search; "out" means the app was not among the results returned on 21 Sep. A demand score of 0 means Play autocomplete did not suggest the phrase.

Your 11 competitors

All 11 titles are built from the same shared keywords: every one carries "cloud" and "storage", and 9 of the 11 add "drive". The last column is only the short label used in the rank table above.

Google Play title	Developer	Installs (15 Sep)	Label in the rank table
Cloud Storage: Cloud Drive App	Fazcon Apps	6.1M	Fazcon
Cloud Storage Backup & Drive	Daily Utility Apps	3.8M	full title
Cloud Storage Drive Backup app	MindByte Studios L.L.C-FZ	656K	full title
Cloud Storage & Cloud Drive	Fuzon Apps	542K	Fuzon
Cloud Backup : Cloud Storage	MAPIDIRECTIONS STUDIOS	452K	full title
Cloudgate: Cloud Storage Drive	CloudGate Technologies	441K	CloudGate
Cloud Storage: Drive Backup	Utility Forge	211K	full title
Cloud Storage Drive: DataHatch	Appseen Studio	19.5K	not in any result set
Nova Cloud: Storage & Backup	Nova Apps Studios	8.7K	not in any result set
ANZ Cloud Drive: Cloud Storage	Auzi Apps Studios	5.5K	not in any result set
Cloud Storage App Drive Backup	Golden Associate Pvt. Ltd.	3.6K	full title

6. Generic keywords versus brand identity: cross-verification

The rule applied in this version. A keyword that many developers carry in their titles is generic to the category and free to use. Brand identity is limited to two things: a real company or product name, and the exact full title of another app. This was tested against 551 app titles (the 522 apps on the keyword board plus 29 fetched live) and against live Play results.

Test 1: are the top keywords shared across many developers? Confirmed.

Keyword in app titles	Third-party titles	Distinct developers	With 100K+ installs	Of your 11 competitors
cloud storage	45	44	19	11
backup and restore	42	38	14	0
cloud backup	12	12	5	1
cloud drive	8	8	3	3
drive backup	5	5	2	3
cloud storage backup	5	5	2	1
secure cloud	5	5	2	0
phone backup	6	6	3	0
cloud storage drive	4	4	3	4
data backup	5	5	1	0

Apps from big companies are excluded from these counts. A keyword carried by this many unrelated developers cannot be one company's brand.

Test 2: does an exact full title work as identity? Confirmed.

- Only 28 of 505 distinct titles (under 6%) are shared by more than one app. The other 94% belong to a single app.
- Where a title is shared, the copies are usually tiny clones beside one established app: "Cloud Backup and Restore" (277K and 3.9K installs), "Phone Backup and Restore" (2.6M and 2.4K), "Cloud Storage : Cloud Backup" (four apps, from 1 install to 1.5M).
- One nuance: Play does leave some duplicate titles live, so an exact match is not always removed. Avoiding exact titles is still the right rule, because an ad carrying another app's full title reads as that app.

Test 3: do generic-keyword titles rank? Confirmed.

On the four searches built from "cloud storage", "drive" and "backup", your competitors hold a rank between #1 and #4 on every one, with titles made only of those generic words, including an app released in Dec 2025 and an app with 3.6K installs (first four rows of the table in section 5).

What changed from version 1

Version 1 stated that no headline matched another app's title. That statement was wrong: it had not been checked by script. The check found two exact matches and two near-exact matches, all now replaced. Two more headlines were extended to carry the "drive" keywords your competitors rank on.

Version 1	What the check found	Version 2
Cloud Storage Backup & Restore	Exact full title of a live app (74.6K installs)	Backup & Restore Cloud Storage
Cloud Backup and Restore	Exact full title of two live apps (277K and 3.9K installs)	Cloud Backup & Easy Restore
Cloud Storage & Data Backup	Near-exact: "Cloud Storage: Data Backup" (3M installs)	Data Backup to Cloud Storage
Data Backup and Restore	Near-exact: "Data Backup and Restore App"	Phone Backup & Quick Restore
Private Cloud Storage	Clear. Extended to add "cloud storage drive"	Private Cloud Storage Drive
Secure Cloud Backup	Clear. Replaced to add "cloud drive" and "drive backup"	Secure Cloud Drive Backup
Descriptions 2 and 6	Contained the exact titles "Cloud Backup and Restore" and "Phone Backup and Restore"	Reworded, same features

Title check on the final 10 headlines. Each was compared with all 551 known titles and with the live Play results for a search of the headline itself (9 to 15 results each). Result: no exact and no near-exact match for any of the 10. A near-exact match means the same words in the same order once "and", "&", "app" and punctuation are ignored.

Real brand names left out of every asset: Google Drive, Google Photos, Google One, OneDrive, Dropbox, iCloud, MEGA, TeraBox, pCloud, Proton, S3Drive, Icedrive, MobiDrive and Smart Switch. The version 1 pass/fail table for "Drive", "Vault", "Photos" and "Gallery" has been removed, because these are generic category words.
